SE2 PROJECT PLAN

PROJECT NAME	END DATE	OVERALL PROGRESS
Media Aggregation Platform	7-Dec	0%

TASK	TASK NAME	RESPONSIBLE	STORY POINTS	START	FINISH	DURATION (DAYS)	STATUS	COMMENTS
	Sprint 1			10/26/18	11/9/18	14	In Progress	
T1	Prototype User Interface	Jakob D.	4				In Progress	Mockup of inital UI design and selection of tools to be used
T2	Hosting Template App on Web Server	Derek F.	4				In Progress	
T3	API Data Testing	Kevon M.	6				In Progress	Prototyping of potential API's
T4	Backend Skeleton Established	Derek F. & Kevon M.	7				In Progress	Skeleton framework should be designed and established, functionality to be implemented later
T5	Database Modeling	Alex A.	7				In Progress	DBM configuration and schema modeling
	Sprint 2			11/10/18	11/23/18	13	Not Started	
T6	API's Integrated with Backend Framework	Kevon M. & Derek F.	8				Not Started	
T7	API Data Formatting	Kevon M.	7				Not Started	Working on establishing a standardized data formatting for the different API's
T8	User Interface Functional	Derek F. & Jakob D.	7				Not Started	Interactive UI should be completed, some features are expected to be missing
T9	User Interface Hosted on Web Server	Derek F. & Jakob D.	6				Not Started	Replacing template application with UI on web server
T10	Database Completed	Alex A.	8				Not Started	Database modeling and testing should be complete
	Sprint 3			11/24/18	12/7/18	13	Not Started	
T11	Database Integrated with Backend	Kevon M. & Alex A.	8				Not Started	
T12	Backend Integrated with User Interface	Jakob D. & Kevon M.	8				Not Started	
T13	Additional Feature Prototyping	Everyone	10				Not Started	Highly dependent on the completion of core features
T14	Sample User Data Created	Derek F. & Alex A.	4				Not Started	Creation of data sets for the database
T15	System Testing	Everyone	6				Not Started	

SPRINT BACKLOG
Sprint 1
User Interface Functionality
Database Model
Backend API Integration
Web Server Configuration
Sprint 2
TBD
Sprint 3
TBD
